

EDUCATIONAL QUALIFICATION

Bachelor of Engineering in Computer Science and Engineering <i>Government College of Engineering and Ceramic Technology</i>	May 2027 CGPA: 9.57
Diploma in Computer Science and Technology <i>The Calcutta Technical School</i>	May 2024 CGPA: 8.3

EXPERIENCE

Euphoria Gen-X — PHP Developer Intern • Engineered backend services utilizing PHP and transitioned application features to a modern MERN stack (MongoDB, Express.js, React, Node.js) architecture to improve overall system scalability. • Designed and implemented RESTful APIs using Node.js and Express.js, seamlessly bridging frontend client requests with backend server logic to optimize data flow. • Acquired extensive hands-on expertise in database management by structuring schemas, developing models, and executing complex queries in MongoDB . • Integrated dynamic React.js components with heterogeneous backend environments, troubleshooting cross-stack data synchronization to deliver a highly responsive user experience.	JUN – AUG 2024
---	-----------------------

PROJECTS

WEATHERGPT <i>React, Node.js, Express.js, MongoDB, Socket.IO, Gemini AI, Twilio, MapTiler, OpenWeather API</i> • Developed an AI-powered weather forecasting and disaster management platform tailored for smart city monitoring and climate analytics for researchers. • Engineered a real-time alert generation system utilizing Twilio SMS and Web Push notifications, synchronized with OpenWeather API and MapTiler for precise reverse geocoding. • Integrated the Gemini Flash model to deliver localized climate insights, incorporating voice-enabled interaction to ensure broad rural offline accessibility. • Built a scalable MERN stack backend featuring Socket.IO for live meteorological data streaming, optimizing evaluation metrics for accuracy, relevance, and response latency.	Live
Find-Home <i>HTML, CSS, JavaScript, MongoDB, EJS, Node.js, Cloudinary</i> • Developed a full-stack hotel and resort management platform with booking, reviews, ratings, and property management. • Built using Node.js, MongoDB, EJS, HTML, CSS, and JavaScript , following the MVC architecture . • Integrated Cloudinary for image upload/storage and MapTiler for interactive map functionality. • Designed a structured backend architecture supporting scalable routing, data management, and server-side rendering.	Live
Canvas.Collab <i>HTML Canvas, CSS, JavaScript, Node.js, Socket.io</i> • Built a real-time drawing application, supporting solo or group drawing. • Used Socket.io for low-latency drawing, enabling instant drawing delivery and live updates. • Used HTML Canvas API for drawing. • Deployed the application on Render for public access.	Live

SKILLS

- **Programming Languages :** C/C++, Java, JavaScript, SQL, NoSQL, HTML/CSS
- **Frameworks & Libraries :** React, Node.js, Express.js, Socket.io
- **Databases & Cloud :** MongoDB, Cloudinary
- **Developer Tools :** Git, GitHub, VS Code, Figma, Linux/Unix
- **Core Areas :** Data Structures & Algorithms, Full-Stack Web Development, Competitive Programming

RELEVANT COURSES

Data Structures	Object-Oriented Programming (OOP)	Computer Networks
Algorithm Analysis	Operating Systems	Database Management Systems (DBMS)

ACHIEVEMENTS

- Scored **99th percentile** in JELET 24

CERTIFICATIONS

- DELTA Web Developer Bootcamp 2025
- ALPHA Competitive Programmer Bootcamp 2025
- NPTEL Soft Skill Development
- NPTEL Database Management System
